Support for all Casio fx-9860G models

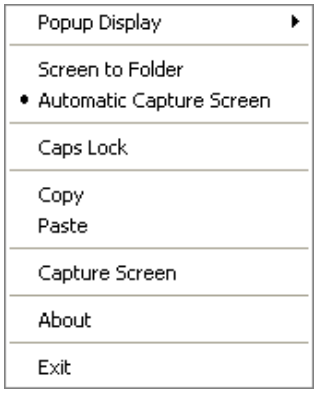
fx-9860G Emulator Function Reference

1. Special Keys

PC Key	Emulator Function
[Tab]	[AC]
[Insert]	[SHIFT]
[Home]	[OPTN]
[PageUp]	[VARS]
[PageDown]	[MENU]
[End]	[ALPHA]
[Esc]	[EXIT]
[Delete]	[DEL]
[Back]	[DEL]
[Enter]	[EXE]
[F1] - [F6]	[F1] - [F6]
[F12]	[Screen capture (*.bmp)]

2. Shortcut Menu

Right-clicking the emulator with the mouse displays a shortcut menu shown at right with the following commands.



Popup Display
Displays the screen on a popup window from x2 to x6 zoom sizes.

Screen to Folder
Displays a dialog box for specifying a file name and folder for storage of screen captures created with the [F12] function key.

Automatic Capture Screen
Configures the computer to assign serial numbered file names to BMP files of screen captures created with the [F12] function key. Files are stored in the folder that it initially specified.

Caps Lock
Uses upper case characters for all alphabetic input on the PC keyboard. Usually best to turn this option off when creating an eActivity.

Copy
Copies the selected area when using the emulator's Clip function. The area also is copied simultaneously to the PC's clipboard.[#1]

Paste
Pastes the PC's clipboard contents into the emulator.[#1] Note however that this command is enabled only in cases where the emulator's Paste command ([SHIFT] [9]) can be performed.

Capture Screen
Copies the current display to the PC's clipboard. The same function can be performed by pressing the emulator's [F-D] key.

About
Displays the emulator version.

Exit
Exits the emulator.

#1 Non-ASCII code characters cannot be displayed properly. Line breaks, for example, are ignored.

3. Save/Load from PC

The function that allows the Casio fx-9860G SD model to access an SD card is used by the fx-9860G emulator to access the PC.

Data can be saved/loaded to/from the PC.

Note, however, that the save/load folder and file location being accessed on the PC should be a local hard disk. Any other type of device (eg network drive) is unlikely to be accessible.
